

PAPER FACE MOUNTED TILES

Preferred Choice for Quality Installations

EXPERIENCED INSTALLATION PROFESSIONALS HAVE ALWAYS PREFERRED PAPER FACED MOUNTED TILES.

- * The biggest advantages of paper face tiles are being able to make adjustments during your set rather than the day after, and avoiding annoying sheet lines.
- ** The sign of true craftsmanship can be found in the smallest of details.

BENEFITS OF PAPER-FACED MOSAIC SHEETS:

- ☞ Easy adjustment of individual tiles while mortar is still workable
- ☞ Avoids annoying sheet lines
- ☞ Ensures possibility of 100% coverage for best bond of tile to substrates
- ☞ No material between the tiles and adhesive to weaken bond
- ☞ No mesh material to feed and promote bacteria growth
- ☞ Allows maximized bond to vitrified materials
- ☞ Allows uniform mortar shrinkage and cure
- ☞ No mounting material to be seen through transparent glass
- ☞ Paper is easily removed with minimal water 20-30 minutes after installation
- ☞ Entire process is easy to accomplish with a little patience

PRO TIP: When removing the paper face, leave some of the paper adhesive prior to grouting. The left-over adhesive on top of the glass provides a perfect grout release. No additional grout release will be needed.

Paper + Patience = Beautiful, Reliable Tile Installations
