Agate, our iconic expression of glassmaking, inspired by the mastery of Italian glass artisans—and all about color in motion.

Like the canals that wind through Venice, streams of color flow through the glass, creating depth, movement, and variation from piece to piece. The fluid effect gives every tile a sense of character. The palette is a tribute to the country's beauty, with colors named for iconic places, from the scintillating blues of Portofino to the soft, weathered greys of Bari.

Please visit LunadaBayTile.com for our complete product offerings, applications and installation instructions.
